Summary

A eager to learn software engineer with 4+ years experience working in an agile environment to plan, design, and implement solutions to business needs that range from simple to the complex. Experienced in front end and back end services. Able to work effectively with product owners, teammates, QA engineers, and UX designers to the roll out of quality software solutions through the entire development lifecycle. Able to analyze, debug, and fix issues that arise through testing. Known as a hard working engineer, but most importantly, eager to learn new skills to broaden all skills.

Objective

To obtain a full time remote position with emphasis towards working with modern tools and frameworks. Primarily, focused on locating the right team; humble, driven, and focused on growth. With the right team in place, the right leadership, and a proven process; the team will always succeed.

Education

Bachelor of Science in Computer Science   **Graduated**: 2016
Kennesaw State University Marietta, Ga   **GPA**: 3.71

Branding Brand
